Work Experience

Web Development Intern	Unidemy Global , Bangalore, India	Oct 2025 – Mar 2026
- Performed database validation testing using SQL queries (SELECT, JOIN, GROUP BY) to ensure data integrity, referential consistency, and accurate backend processing - Participated in sprint discussions and contributed to improving application performance, usability, and system reliability. - Worked on SEO optimization including keyword research and on-page improvements - Enhanced website visibility by optimizing meta tags, content, and technical SEO factors		

PROJECTS

Cini Nova Demo	<i>HTML, Java, Spring Boot, OAuth2, JPA, Rest API, Feign Client MySQL</i>	<i>[Ongoing]</i>
- Designed and developed a BookMyShow-like application using Spring Boot with a microservices architecture, including separate services for movie management, theatre scheduling, and ticket booking. - Implemented service discovery with Netflix Eureka, centralized routing via Spring Cloud Gateway, and secure authentication using OAuth2 - Enabled inter-service communication using Feign Client, added fault tolerance with Resilience4j, and monitored system performance using Zipkin(Source Code)		
Emotion Based Music Recommendation System Demo	<i>React-JS, Lambda, API-Gateway, AWS-Rekognition</i>	<i>Nov25 – Dec 25</i>
- Built a serverless emotion-based music recommendation system using React.js, AWS Lambda, and AWS Rekognition. - Detected user emotions from webcam images and generated personalized music playlists via REST APIs. - Improved response time by 50%, achieved fault tolerance, and attained 93% emotion detection accuracy. (Source Code)		
High Available Web App Demo	<i>AWS, EC2, ALB, Auto Scaling, CloudFront, CDN</i>	<i>Dec 25 – Jan 26</i>
- Designed and deployed a highly available web application using AWS EC2, Application Load Balancer, Auto Scaling Group, and CloudFront, achieving 99.9% availability and seamless access across mobile and desktop platforms. Implemented CloudFront with HTTPS in front of the Application Load Balancer, improving page load performance by ~40% and enabling secure, low-latency global content delivery, Configured Auto Scaling with health checks and launch templates.		

EDUCATION

Acharya Institute of Technology <i>Bachelor of Engineering in Computer Science</i>	<i>Aug 2022 – May 2026</i>
DVS PU College <i>12th grade—physics, chemistry, mathematics</i>	<i>Aug 2020 – May 2022</i>

SKILLS

Languages: JavaScript, Java
Cloud: AWS (EC2, S3, RDS, IAM, VPC, CloudFront, Lambda, EKS,EFS),
Back End: Spring Boot, Hibernate, JPA, JDBC, Maven, MySQL
Front End: HTML, CSS3,
Devops Tools : GitHub, Git-Bash, Docker, Kubernetes, Terraform, Jenkins.
CS Fundamentals: Data Structures & Algorithms, OOPS, DBMS, Operating Systems, Computer Networks.
